Information and Addresses

About Keysight Technologies

Keysight Technologies (NYSE:KEYS) is a global electronic measurement technology and market leader helping to transform its customers' measurement experience through innovations in wireless, modular, and software solutions. Keysight's electronic measurement instruments, systems, software and services are used in the design, development, manufacture, installation, deployment and operation of electronic equipment. The business had revenues of \$2.9 billion in fiscal year 2015.

Keysight in Germany

About 400 employees work at Keysight Technologies in Germany, the majority in Boeblingen near Stuttgart. In 1959, Hewlett-Packard's first plant in Europe was founded in Boeblingen. Measurement solutions for the computer- and communications-industry, by means of optical and high frequency digital technologies, are developed and manufactured here. Component and system manufacturers as well as network equipment manufacturers all rely on Keysight's instruments, ranging from the development and qualification of fast ICs (Integrated Circuits) to extremely powerful network elements. Keysight's optical and electronic signal generators as well as Bit Error Ratio Testers belong to the world's leading test and measurement products.
